

Get The Lead Out

HYBRID FAUCETS FROM PHOENIX

**METAL TOUGHNESS
PLASTIC ECONOMY**

- New metal-plastic composite has the strength of brass and the corrosion resistance of economical plastic
- Drinking water never contacts metal
- Meets all State and Federal low lead and safe drinking water requirements
- WaterSense technology uses 20% less water than your old faucet without changing your water stream
- Single handle ceramic disc or two handle quarter turn washerless valves
- ADA compliant handles on all models

The biggest faucet innovation in decades is available from Phoenix Products. We pioneered the use of plastic in faucets. And now we're excited to introduce the next big leap in faucet technology.
